

HANDLE A INSTALLATION INSTRUCTIONS

www.andres.glass

Andres Glass Solutions OÜ recommends using the help or service of a specialist in the field when installing the products.

Before installing or using the product, read the installation, use, maintenance, and warranty instructions.

The package includes:

- two threaded wooden handles
- protective seals
- threaded metal rod

INSTALLATION:

1. Before installation, make sure that all parts included in the package are present.
2. Screw the metal rod into one of the handles until it stops moving.
3. Install the seals provided and carefully place the handle side into the hole made in the glass.

NB! The threaded metal rod must not come into contact with the glass - this may damage the glass.

4. Holding the already installed handle close to the glass, carefully screw the other side of the handle onto the metal rod.

5. Tighten the handle moderately – avoid excessive force.
